Bartow County Staff only

When was the last time you were *early*?

When was the last time you finished
something *ahead* of schedule?

Take on the Grant writing project you've been
planning and finish way ahead of the
deadline.

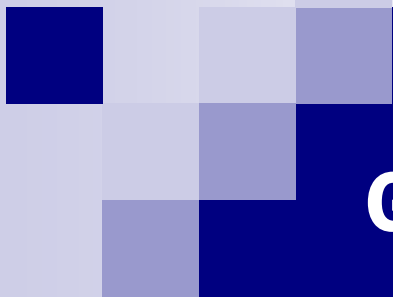

The **OUTCOME...** your class could be well
rewarded... **THAT'S GREAT NEWS!**

No more deadline scrambling, you can do this.

The Power of Early

There is tremendous power in finishing things early. It should not be underestimated. Some people think, "OK, so you finished early. Now you can do some more work..."

However, it is much more powerful than that. It has an almost exponential effect on your productivity and work results. And no matter what the "last minute" people will tell you, it feels much better to be "ahead of the curve."
